Decision Support Methodologies for Human Health Risk Assessment of Toxic Substances

Proceedings of the 1993 Decision Support Methodologies International Workshop, Agency for Toxic Substances and Disease Registry, Atlanta, GA, USA, 18–20, October 1993

Introduction
Jewell D. Wilson, William Cibulas and Edward Murray 1

Welcome Address
Barry L. Johnson 3

Charge to the Workshop
Christopher T. DeRosa 7

Session I. Informational Needs to Support Human Health Risk Assessment of Toxic Substances

ATSDR's Information Databases to Support Human Health Risk Assessment of Toxic Substances
Barry L. Johnson. 11

Risk Assessment and Research: An Essential Link
John J. Vandenberg 17

Information Needed to Support Hazard Identification and Risk Assessment of Toxic Substances
Robert J. Scheuplein. 23

Use of Mechanistic and Pharmacokinetic Data for Risk Assessment at the National Institute of Environmental Health Sciences (NIEHS)
Bernard A. Schwetz 29

Session II. Conceptual Basis and Current Trends in use of PBPK/PD Models, SAR and Toxicity Estimation Systems As Decision-Based Tools

Development of Physiologically-Based Pharmacokinetic and Physiologically-Based Pharmacodynamic Models for Applications in Toxicology and Risk Assessment
Melvin E. Andersen 35

The Expanding Role of Quantitative Structure-Activity Relationships (QSAR) in Toxicology
Corwin Hansch, D. Hoekman, A. Leo, L. Zhang and P. Li. 45

Physiologically-based Pharmacokinetic and Pharmacodynamic Modeling in Health Risk Assessment and Characterization of Hazardous Substances
Hong-Wing Leung and Dennis Paustenbach 55

The New Chemicals Process at Environmental Protection Agency (EPA): Structure-Activity Relationships for Hazard Identification and Risk Assessment
Pauline M. Wagner, J.V. Nabholz and R.J. Kent 67

Session III. Requirements for Developing Physiologically-based Pharmacokinetic and Pharmacodynamic (PBPK/PD) Models and Structure-Activity-Relationship (SAR) and Toxicity Estimation Methods

Extrapolation of Physiological Parameters for Physiologically Based Simulation Models
Vera Fiserova-Bergerova 77

Development of Partition Coefficients, V_{max} and K_m Values, and Allometric Relationships
James B. Knaak, M.A. Al-Bayati and O.G. Raabe 87

Physiologically-Based Pharmacokinetic Models: Mathematical Fundamentals and Simulation Implementations
Kim-Chi Hoang 99

Achieving Credibility in Risk Assessment Models
Micheal Kohn 107

Role of Computational Chemistry in Support of Hazard ID: Mechanism-Based SARs
Ann Richard 115

Threshold of Estimated Toxicity for Regulation of Indirect Food Additives
Edward J. Matthews and E.J. Machuga 123
Assessment of Effect Levels of Chemicals from Quantitative Structure-Activity-Relationship (QSAR) Models. I. Chronic Lowest-Observed-Adverse-Effect-Level (LOAEL)
M.M. Mumtaz, L.A. Knauf, D.J. Reisman, W.B. Peirano and C.T. DeRosa, V.K. Gombar, K. Enslein, J.R. Carter, B.W. Blake, K.I. Huque and V.M.S. Ramanujam. 131
Toxicity Estimation by Chemical Substructure Analysis: The Tox II Program
Gilles Klopman and H.S. Rosenkranz. 145
A Thermodynamic QSAR Analysis of the Polysubstrate Monoxygenase Response to Xenobiotic Chemicals
Bryan R. Hollebone and L.J. Brownlee 157

Session IV. Current Applications and Uncertainties in PBPK/PD and SAR Modeling and Toxicity Estimation Methods for Assessing the Risk Posed to Humans by Hazardous Substances in the Environment

The Application of Dosimetry Models to Identify Key Processes and Parameters for Default Dose-Response Assessment Approaches
Annie M. Jarabek 171
The Application of Physiologically-Based Pharmacokinetic/Pharmacodynamic (PBPK/PD) Modeling to Understanding the Mechanism of Action of Hazardous Substances
Michele Medinsky 185
The Application of Physiologically-Based Pharmacokinetic/Pharmacodynamic (PB-PK/PD) Modeling for Exploring Risk Assessment Approaches of Chemical Mixtures
R.S.H. Yang, H.A. El-Masri, R.S. Thomas, A.A. Constan and J.D. Tessari 193
Summary of Panel Discussion on the 'Advantages/Limitations/Uncertainties in the Use of Physiologically-Based Pharmacokinetic and Pharmacodynamic Models in Hazard Identification and Risk Assessment of Toxic Substances'
Clay B. Frederick 201
The Application of Physiologically Based Pharmacokinetic Modeling in Human Health Risk Assessment of Hazardous Substances
Harvey J. Clewell, III 207
Development of Structure-Activity Relationship Rules for Predicting Carcinogenic Potential of Chemicals
Yin-tak Woo, D. Lai, M. Argus and J. Arcos 219
Quantitative Structure-Activity Relationships and Ecological Risk Assessment: An Overview of Predictive Aquatic Toxicology Research
Steven Bradbury 229
Use of Graph Theoretic Parameters in Risk Assessment of Chemicals
Subash C. Basak, S. Bertelsen and G.D. Grundwald 239
The Identification and Testing of Interaction Patterns
P. Durkin, R. Hertzberg, W. Stiteler and M. Mumtaz 251
Summary and Recommendations for Session B: Activity Classification and Structure-Activity Relationship Modeling for Human Health Risk Assessment of Toxic Substances
Douglas W. Bristol. 265

Session V. Perspectives on Collaboration and Infrastructure Development Between Government, Academia and Industry

Decision Support Methodologies for Human Health Assessment of Toxic Substances: Agency for Toxic Substances and Disease Registry's Perspectives on Collaboration and Infrastructure Development among Government, Academia, and Industry
Christopher T. DeRosa 283
NIEHS Perspectives on Collaboration Among Government, Academia and Industry
Kenneth Olden 287
Program Development in Military Toxicology Laboratories
David R. Mattie, L.S. Martin and T.A. Childress. 291
Perspectives on Collaboration and Infrastructure Development Among Government, Academia and Industry
Ellen J. O'Flaherty. 297
Extrapolating The Future: Research Trends in Modeling
Daniel B. Menzel. 299
Perspectives on Collaboration and Infrastructure Development: Industry Perspectives
James B. Knaak 305
